

Functional Branch

Consultant for Geographic and
Cartographic Intelligence

1. It is believed that the Consultant on Geography and Cartography for the Functional Branch, ORE should:

a. Familiarize himself with current and projected activities of the government agencies concerned with broad geographic problems and the preparation and/or collection of maps, charts and photographs;

b. Study the basic directives of C.I.G., orient himself as to the internal organization and functions of ORE and make himself generally familiar with the work of the Regional Branches;

c. Plan, initiate and supervise a program to provide:

(1) For C.I.G. to be kept informed of all activities, whether government, private or foreign concerned with geographic and cartographic intelligence;

(2) C.I.G. coordination or direction, as appropriate, of those interdepartmental projects covering his field of intelligence of common concern to more than one government agency;

(3) C.I.G. with competent advice and the best attainable materials concerned with geographic and cartographic intelligence;

(4) Coordination and integration of research concerned with his field in the Regional Branches; and

(5) For a continuous study of the requirements for geographic and cartographic intelligence so as to appraise the value of that received in C.I.G. and government agencies, and arrange for the procurement of information and intelligence not available.

d. Act as adviser to responsible officers of C.I.G. concerning his field and serve as consultant to the Planning Staff and Intelligence Staff of ORE with regard to geographic and cartographic intelligence.

e. Provide for such additional activities as may be required.
